Response to Amendment

1. An RCE was filed May 4, 2005 and a non-final rejection follows. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For example, "ghost pools" are not clearly understood and as such the metes and bonds of ghost pools cannot be easily determined. The first occurrence of the term occurs on page 3 the applicant's specification where the applicant states "In accordance with yet another embodiment of the present invention, ghost pools are used to select preferred merchants for particular auctions." Claim 4 specifies merchants bid on ghost pools.

Art Unit: 3628

Also in claim 4, the phrase "hypothetical customers" is used. What exactly are "hypothetical customers", customers that do not exist? How are non-existent customers grouped into ghost pools? The term ghost imply one can't see the customers because they don't exist? Is this the same thing as specifying simulating auctions or analyzing historical data?

3. Due to the indefiniteness of the limitation as explained in the 35 USC § 112 rejection, the following rejections are based upon the broadest interpretation of the claims.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly

Art Unit: 3628

or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Rackson (US 6,415,270).

Rackson discloses a computer implemented method for an on-line auction (Figs. 2-13, especially Figs. 2-3, 10-11, and respective disclosure; col. 13, line 1) of the type wherein **one** customer (bidder, 20, or 22, Figs. 2-3, 10-11; bidders, Figs. 5-9) may purchase a product supplied by **one** merchant (Figs. 2-14 and respective disclosure) said method comprising the steps of:

acquiring, over a network (16, Fig. 2, or Figs. 3, 10-11) customer information from said **one** customer (50, Fig. 10; or 32, Fig. 11; 600, Fig. 13; bidder's name, contact data, port address, email ID or other indicia, Fig. 14; col. 14, lines 30-49; collecting market data, col. 23, lines 18-29) said customer information including a Program Term selected from one Program Term associated with said product (features of products such as price, manufacturer, condition, Fig. 12; col. 24, lines 5-67; bidder parameters, 600, Fig. 13; parameters of item, 104, Fig.

notifying over said network said preferred merchant of said preferred bid (154, Fig. 4; 654, Fig. 13; cols. 1-26), as specified in claim 1;

wherein said grouping step includes grouping said customers via characteristic pooling in accordance with a Program Term associated with a characteristic of said customers (**each separate auction Nos. 1-3 or 1-5 comprises a pool of bidders bidding on an item with the same features, indicia, or characteristics, grouping bidders into separate auctions by duplication if necessary, Figs. 6, 8-9; grouping French bidders or bidders using the same currency into a pool, col. 15, lines 23-38; using characteristics of bidders in breaking ties when Tied bidders bidding on an item with the same features/indicia are grouped into one or more pools of bidders automatically, see disclosure of tied bidders, cols. 1-26, especially col. 21,**

wherein said grouping step includes grouping said customers via commitment (registering with an auction site is a level of commitment, bidding, selecting a price level, using a specific credit card, having a credit rating are all considered levels of commitment, cols. 1-26) pooling in accordance with a Program Term associated with the customers level of commitment (each separate auction Nos. 1-3 or 1-5 comprises a pool of bidders bidding on an item with the same features, indicia, or characteristics, grouping bidders into separate auctions by duplication if necessary, Figs. 6, 8-9; grouping French bidders or bidders using the same currency into a pool, col. 15, lines 23-38; Tied bidders bidding on an item with the same features/indicia are grouped into one or more pools automatically, see disclosure of tied bidders, cols. 1-26, especially col. 21, lines 50-64; col. 13, lines 8-35; and using priority schemes to break ties, col. 13, lines 8-19; ranking bidders, col. 21, lines 55-63; or allowing one or more bidders
